Thanks Dan for letting me know about the Brindies ride today which was organised by Lebster over at CR www.canberrariders.org.au. I had a blast opening it up in some sections and also enjoyed just cruising sometimes.

Great to see another drz400e.com member Ozzy on the ride. Ozzy don't remove that 28 litre tank you will get used to it. Here are some pictures from the day as you can see I did a bit more riding after everyone left and had an incident with a car, as you can see the DRZ came out the winner.

Oh I did get a little bit of video and will post it later, but I missed the bit where Lebster just about lost it big time.

If your interested in knowing where we went you can save the gps file below to your computer and open it in google earth. If you don't have google earth you can download it for free at <http://www.google.com/earth/download/ge/>
